

Handscanner

Simplify inventory management effortlessly with our **hand scanners**. Capture objects in seconds and **generate accurate digital twins** effortlessly for enhanced efficiency and precision.

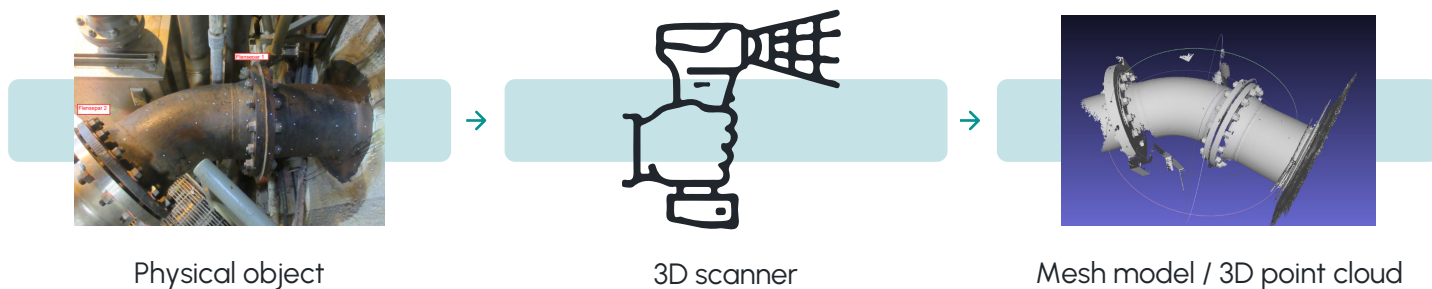

How it can be used

With handscanner you can capture the physical shape and appearance of objects by collecting data points from their surfaces. The mesh object represents physical object in a three-dimensional space, next can be stored digitally as a part of the virtual digital library.

Services

We offer a scanning service where our experienced team will identify and set optimal parameters for data capture. This results in the creation of an optimized 3D model.

Rental

Explore the convenience of hand scanner rentals. Our company provides the option to fully rent the equipment, including initial user training, support, and data processing throughout the rental period.
